## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 47, 48 and 51-55, drawn to a plant delta-6 desaturase, and cells and plants transformed therewith, classified in class 536, subclass 23.6.
  - III. Claim 47, 49 and 51-55, drawn to a bacterial delta-6 desaturase, and cells and plants transformed therewith, classified in class 536, subclass 23.7.
  - III. Claim 47, 50 and 51-55, drawn to a fungal delta-6 desaturase, and cells and plants transformed therewith, classified in class 536, subclass 23.74.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I-III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions of Groups I-III require different sequences that differ structurally and require different searches. Each of the sequences of Groups I-III are capable of being separately made, independently used and one is not required by either of the others.

Art Unit: 1638

3. Because these inventions are distinct for the reasons given above and the search required for Groups I-III are not required by any of the others, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
